COOKIE POLICY AND SIMILAR TECHNOLOGIES POLICY OF THE ZETA SIGNALS SERVICE

Effective date: [date]

Document version: 1.0

Service address: [domain address]

§ 1. General provisions

1. This Cookie Policy and Similar Technologies Policy, hereinafter referred to as the “Cookie Policy”, sets out the rules for using cookies, LocalStorage, SessionStorage and other similar technologies within the website operating under the name Zeta Signals, available at [domain address], hereinafter referred to as the “Service”.

2. The controller of the Service is [First Name and Last Name], an individual conducting non-registered activity, contact address: [Residential/Contact Address], contact e-mail address: support@zetasignals.pl, hereinafter referred to as the “Controller”.

3. This Cookie Policy supplements the Terms of Service of Zeta Signals and the Privacy Policy of Zeta Signals.

4. The Service operates using Next.js technology and uses technical solutions provided by third parties, in particular Supabase and Lemon Squeezy.

5. The purpose of this Cookie Policy is to provide the User with clear, complete and understandable information about what cookies and similar technologies are, which technologies are used in the Service, for what purposes they are used, which technologies are necessary for the Service to operate, which technologies may originate from third parties, and how the User can manage cookies and similar technologies.

6. This Cookie Policy applies both to cookies stored directly by the Service and to similar technologies for storing information on the User's terminal device, such as LocalStorage or SessionStorage.

§ 2. What cookies, LocalStorage and similar technologies are

1. Cookies are small text files stored on the User's terminal device, such as a computer, phone, tablet or other device enabling the use of the Internet.

2. Cookies may contain technical information enabling the browser to be recognized, the session to be maintained, User preferences to be remembered, security to be ensured, login to be handled or specific functions of the Service to operate properly.

3. LocalStorage is a browser storage mechanism that enables data to be stored locally on the User's device. Data stored in LocalStorage may remain stored even after the browser is closed, until it is deleted by the User, the Service or the browser mechanism.

4. SessionStorage is a browser storage mechanism similar to LocalStorage; however, data stored in SessionStorage is generally maintained only for the duration of a given browser session.

5. Similar technologies means other technical solutions that enable information to be stored on the User's terminal device or access to information already stored on that device, regardless of their name or technical implementation.

6. In this Cookie Policy, the term “cookies” may also include LocalStorage, SessionStorage and other similar technologies, if the context indicates that the storage of information or access to information on the User's terminal device is meant.

§ 3. Legal bases for using cookies and similar technologies

1. The use of cookies and similar technologies takes place in accordance with applicable law, in particular the Polish Act of 12 July 2024 - Electronic Communications Law, Directive 2002/58/EC of the European Parliament and of the Council, known as the ePrivacy Directive, and Regulation (EU) 2016/679 of the European

Parliament and of the Council, known as the GDPR, if information obtained using cookies or similar technologies constitutes personal data or is linked to personal data.

2. Under the previous Polish legal framework, these matters were associated in particular with Article 173 of the Telecommunications Law. As of the date of this Cookie Policy, the Electronic Communications Law is of primary importance, in particular the provisions concerning the storage of information or access to information stored on the User's telecommunications terminal device.

3. Storing information or accessing information stored on the User's terminal device is permitted in particular where the User has been informed in advance about the purpose of such action, has given consent where consent is required, or where storage or access is necessary to provide a service requested by the User or to transmit a communication over a telecommunications network.

4. Cookies and technologies necessary for the operation of the Service may be used without separate consent of the User if they are necessary to provide a service expressly requested by the User or to ensure the transmission of a communication.

5. Cookies and technologies used for purposes other than necessary purposes, in particular analytics, advertising, marketing, remarketing or profiling, may be used only after obtaining appropriate consent from the User, where such consent is required by law.

6. If personal data is processed through cookies or similar technologies, the legal basis for processing may include Article 6(1)(b) GDPR, Article 6(1)(f) GDPR or Article 6(1)(a) GDPR.

7. The Controller's legitimate interest does not replace the requirement to obtain consent for cookies or similar technologies where such consent is required under the rules concerning the storage of information or access to information on the User's terminal device.

§ 4. Categories of cookies and technologies used in the Service

1) Necessary cookies and technologies

1. These are cookies, LocalStorage, SessionStorage or other technologies that are necessary for the proper operation of the Service, login, session maintenance, security, Account handling, Subscription handling or remembering the User's decisions regarding cookies.

2. Without these technologies, the Service may not operate properly and use of the Account, user panel or paid functions may be impossible.

3. These technologies do not require separate consent of the User, provided that they are genuinely necessary to provide a service requested by the User.

2) Security cookies and technologies

1. These are technologies used to protect the Service against abuse, attacks, unauthorized access, attempts to bypass security measures, payment fraud and CSRF attacks.

2. They may include, among others, session identifiers, security tokens, timestamps, information about login attempts or elements allowing suspicious activity to be detected.

3. The purpose of these technologies is to protect the User, the Controller and the integrity of the Service.

3) Payment cookies and technologies

1. These are technologies used to handle payments, Subscriptions, carts, checkout, linking a transaction to a User Account and preventing financial fraud.

2. These technologies may be used by Lemon Squeezy as an external payment operator and Merchant of Record.

3. Lemon Squeezy cookies and technologies may be used in particular when the User proceeds to checkout, opens the payment form, initiates a purchase or manages a Subscription.

4) Preference cookies

1. These are technologies that enable the User's decisions regarding cookie settings, language version or other basic interface preferences to be remembered.

2. The Service may use LocalStorage to record whether the User has seen the cookie banner or what decisions the User has made with respect to available settings.

5) Analytics or marketing cookies

1. As of the effective date of this Cookie Policy, the Service should not use analytics, advertising, marketing or remarketing cookies without obtaining separate consent from the User.

2. If the Controller implements tools such as Google Analytics, Meta Pixel, TikTok Pixel, Hotjar, Microsoft Clarity or other similar analytics or marketing tools in the future, this Cookie Policy should be updated and the User should be given the option to give or refuse consent before such technologies are launched.

§ 5. Detailed list of cookies and similar technologies used

The table below describes the main categories of cookies and similar technologies used or potentially used in the Service. Specific technical names may vary depending on the configuration of the Service, Supabase, Lemon Squeezy, browser and software version.

Category	Provider	Example name / technology	Purpose	Retention period	Is consent required?
Necessary - user session	Zeta Signals / Supabase	LocalStorage, session token, access_token, refresh_token, Supabase Auth keys, e.g. sb-[project-ref]-auth-token	Maintaining the User's session, enabling login, preserving access after page refresh, Account handling	For the session duration or until logout, token expiry, deletion by the User or the Supabase mechanism	No, if necessary for login and Account operation
Necessary - authorization	Supabase	Supabase Auth session data	User authentication and securing access to the panel	In accordance with Supabase session configuration	No, if necessary for Account use
Necessary - security	Zeta Signals / technical providers	CSRF token, session identifier, security data	Protection against CSRF attacks, unauthorized access and abuse	Usually for the session duration or a shorter technical period	No, if necessary for Service security
Necessary - cookie decision	Zeta Signals	LocalStorage, e.g. cookieConsent, cookiePreferences, zeta_cookie_consent	Remembering the User's decision regarding the cookie banner	Until preferences are changed, browser data is deleted or the period set in the Service expires	No, if used only to remember privacy decisions
Payments and Subscription	Lemon Squeezy	Lemon Squeezy checkout cookies and identifiers	Checkout, cart, payment, Subscription handling, linking the transaction to the Account, fraud prevention	In accordance with Lemon Squeezy policies and payment service configuration	Generally no, if necessary for payment execution and transaction security; otherwise according to Lemon Squeezy policy
Payment security	Lemon Squeezy / payment partners	Anti-fraud identifiers, device technical data, security files	Detecting and preventing financial fraud, chargebacks, payment abuse and unauthorized transactions	In accordance with Lemon Squeezy policies and payment/security regulations	Depending on the nature of the technology; necessary security elements may not require consent
Interface preferences	Zeta Signals	LocalStorage, e.g. preferred language	Remembering the selected language version of the Service or other basic interface settings	Until preferences are changed or data is deleted by the User	Usually no, if it serves to provide the service according to the User's choice
Analytics	Zeta Signals or potential third-party providers	No active tools as of the effective date, unless later implemented by the Service	Traffic analysis, statistics, Service improvement	Depending on provider	Yes, if not necessary
Marketing / advertising	Zeta Signals or potential third-party providers	No active tools as of the effective date, unless later implemented by the Service	Advertising, remarketing, marketing profiling	Depending on provider	Yes

§ 6. Supabase Auth and session storage

1. The Service uses Supabase Auth to handle User registration, login and authorization.

2. Supabase Auth may use LocalStorage, cookies or other browser technical mechanisms to store information about the User's session, including access or refresh tokens.

3. Session data is necessary so that the User can log into the Account, remain logged in after refreshing the page, use the user panel, access functions available only to logged-in Users and use paid functions after Subscription activation.

4. Blocking LocalStorage, cookies or other browser storage mechanisms may prevent login, session maintenance or proper use of the Zeta Signals panel.

5. The User may end the session by logging out of the Account. The User may also delete locally stored data through browser settings.

§ 7. Lemon Squeezy and payment-related cookies

1. Payments and Subscriptions in the Service are handled by Lemon Squeezy.

2. When a payment is initiated, checkout is opened, a Subscription is managed or a transaction is processed, Lemon Squeezy may use its own cookies or similar technologies.

3. Lemon Squeezy technologies may be used in particular for proper checkout handling, cart or payment form operation, transaction identification, linking payment to the User Account, Subscription handling, detecting and preventing financial fraud, counteracting chargebacks and abuse, ensuring payment security and fulfilling Lemon Squeezy's legal obligations as a payment operator and Merchant of Record.

4. The Controller does not have full control over all cookies and technologies used directly by Lemon Squeezy in its own payment environment.

5. With respect to cookies and similar technologies used by Lemon Squeezy, Lemon Squeezy's legal documents may also apply, in particular its privacy policy, cookie policy, terms of service and payment-related documents.

6. The User should review Lemon Squeezy's documents before making a payment.

§ 8. Cookie banner and consent management in the Service

1. The Service may display a cookie banner or privacy preference panel to the User.

2. The cookie banner may be used to inform the User about the use of cookies and similar technologies, enable acceptance of optional cookies, enable refusal of optional cookies, enable preference changes and record the User's decision so that the message is not displayed on every visit.

3. Cookies and technologies necessary for the operation of the Service may remain active regardless of the User's decision regarding optional cookies.

4. Optional cookies, in particular analytics, marketing or advertising cookies, should not be launched before the User gives consent, where consent is required by law.

5. The User should be able to withdraw consent as easily as it was given.

6. If a cookie preference panel is available in the Service, the User may change settings through that panel at any time.

7. If a cookie preference panel is not available, the User may manage cookies and similar technologies through browser settings.

§ 9. How to manage cookies and LocalStorage through the browser

1. The User may independently manage cookies, LocalStorage, SessionStorage and other site data through the settings of the web browser.

2. In particular, the User may delete existing cookies and site data, block cookies, block third-party cookies, delete LocalStorage and SessionStorage data, set automatic deletion of data after closing the browser or use private/incognito mode.

3. Blocking necessary cookies and technologies may make it impossible to log into the Account, prevent the User session from being maintained after refreshing the page, cause the Zeta Signals panel to malfunction, prevent the Subscription from being correctly recognized, prevent checkout or payment from being correctly

processed and cause the Service to display technical errors.

4. Below are example paths for managing cookies in popular browsers. Setting names may vary depending on browser version, operating system or interface language.

1) Google Chrome

1. Open Chrome. Click the three-dot icon in the upper-right corner. Go to Settings. Go to Privacy and security. Select Third-party cookies or Site settings. Manage consents, block cookies or delete site data. To delete data for a specific site, go to site data settings and search for the Service domain.

2) Mozilla Firefox

1. Open Firefox. Click the menu icon in the upper-right corner. Go to Settings. Go to Privacy & Security. In the Cookies and Site Data section, select the relevant settings. You can delete data, manage exceptions or block selected tracking mechanisms.

3) Safari

1. Open Safari. Go to Settings or Preferences. Open the Privacy tab. Manage cookies, site data and tracking settings. You can delete data for selected websites or block specific mechanisms.

4) Microsoft Edge

1. Open Microsoft Edge. Click the three-dot icon in the upper-right corner. Go to Settings. Go to Cookies and site permissions. Select Manage and delete cookies and site data. Delete data, block third-party cookies or set exceptions for selected websites.

5. The User may also delete data stored in LocalStorage and SessionStorage using browser developer tools, although this method is intended primarily for technical users.

§ 10. Session cookies and persistent cookies

1. The Service may use both session cookies and persistent cookies.

2. Session cookies are stored for the duration of the browser session and are usually deleted after the browser is closed, unless the browser or service configuration operates differently.

3. Persistent cookies remain stored on the User's device for a specified period or until they are deleted by the User, the browser, the Service or the provider of a given technology.

4. LocalStorage may operate similarly to persistent cookies because data stored in it may remain in the browser until deleted.

5. The retention period of individual cookies and local data may depend on the configuration of the Service, Supabase configuration, Lemon Squeezy configuration, User browser settings, manual deletion of data by the User and technical changes in the Service.

§ 11. First-party and third-party cookies

1. First-party cookies are set directly by the Service or within its domain.

2. Third-party cookies are set by external service providers whose solutions are used in the Service or in the payment process.

3. In the Service, third-party cookies or technologies may come in particular from Supabase - in the scope of authorization, database and session infrastructure - and Lemon Squeezy - in the scope of payments, checkout, Subscriptions, settlements and transaction security.

4. The Controller does not have full control over the lifecycle of all cookies used by third parties in their own environments, in particular in the external Lemon Squeezy checkout.

5. When visiting an external provider's website, the User should review that provider's legal documents.

§ 12. Refusal of optional cookies

1. Refusal of optional cookies should not prevent the use of the basic functions of the Service, unless a given function technically requires the use of a specific necessary technology.

2. Refusal of analytics, advertising or marketing cookies must not result in blocking access to the Service if those cookies are not necessary to provide the service requested by the User.

3. The Controller should not use mechanisms forcing consent to optional cookies as a condition of access to the Service where this is not compliant with applicable law.

§ 13. Updating the cookie list

1. Technologies used in the Service may change as the Service develops, Next.js is updated, Supabase configuration changes, Lemon Squeezy configuration changes or new functions are implemented.

2. The Controller should periodically verify the actual list of cookies and similar technologies used in the Service.

3. If new categories of cookies are implemented, in particular analytics, marketing, advertising or remarketing cookies, the Controller should update this Cookie Policy, update the cookie banner or preference panel, ensure the possibility to give or refuse consent before optional cookies are launched and supplement the Privacy Policy if personal data is processed for a new purpose.

4. The User can check currently stored cookies and site data through browser settings.

§ 14. Security and technical limitations

1. The Controller uses due care to ensure that cookies and similar technologies used in the Service are limited to the extent necessary to achieve specified purposes.

2. The Controller should apply appropriate technical and organizational measures to protect data processed using cookies and similar technologies.

3. The use of cookies and similar technologies should not lead to the collection of data excessive in relation to the purposes specified in this Cookie Policy.

4. The User should regularly update the web browser and operating system, because outdated software may increase the risk of security breaches.

§ 15. Changes to the Cookie Policy

1. The Controller may amend this Cookie Policy in the event of changes in law, changes in technologies used in the Service, changes in external providers, implementation of new Service functions, implementation of new cookies or similar technologies, changes in payment handling or the need to clarify information provided to Users.

2. The current version of the Cookie Policy is published in the Service.

3. If changes are material to Users' privacy, the Controller may additionally inform Users about the changes, for example through a message in the Service or by e-mail.

§ 16. Contact

1. In matters concerning this Cookie Policy, the User may contact the Controller at the following e-mail address: support@zetasignals.pl.

2. In matters concerning the processing of personal data in connection with cookies and similar technologies, the Privacy Policy of Zeta Signals also applies.

§ 17. Final provisions

1. This Cookie Policy applies from [date].

2. The Cookie Policy is available free of charge in the Service in a manner allowing it to be obtained, reproduced and stored.

3. To the extent not regulated by this Cookie Policy, the applicable provisions of Polish law and European Union law shall apply.

4. This Cookie Policy should be interpreted together with the Terms of Service and the Privacy Policy of Zeta Signals.

5. In the event of any discrepancy between the Polish and English versions of this Cookie Policy, the Polish version shall prevail to the extent permitted by applicable law.
